## Introduction

WILLIAM SHAKESPEARE<sup>1</sup> from Hamlet, spoken by Hamlet,

Hamlet is spoken, MAA (Author) is responding

To be, or not to be, that is the question: Whether 'tis nobler in the mind to suffer The slings and arrows of outrageous fortune, Or to take arms against a sea of troubles And by opposing end them. To die—to sleep, No more; and by a sleep to say we end. The heart-ache and the thousand natural shocks That flesh is heir to: 'tis a consummation. Devoutly to be wish'd. To die, to sleep. To sleep, perchance to dream—ay, there's the rub: For in that sleep of death what dreams may come, When we have shuffled off this mortal coil, Must give us pause—there's the respect. That makes calamity of so long life. For who would bear the whips and scorns of time,	If you are present, does it requires question? Each person is same as other, equality, not any noble feature. Nobody knows the future, so not be on suffer. If I am in ethical principles, not afraid of anything. Troubles for finding solutions. Every living organism, one day be died. What will be during the life? Performing, establishing values, or not. Heart-aches and the natural shocks, for standing up. The importance is the mind, ideas, and philosophies, not the body. Heir as humanity and several perspective left. Why be in astonishing, for the new generation? No required dreams, the generation is there, easily seen. It is not a mortal coil, it is a new birth, birth of love. Not any pause, even no hesitation, If in love, respect is continuous. Even after death. The disastrous be a lesson for run away. Forgiveness and compensation will let them out. Break the relation to unchain your heart, form the fact. Fighting with oppressor and cruelty for being in peace. Love indicates the civil liberties, Human Right to be active. The love in your heart be covers all of you.
--	---

<p>Th'oppressor's wrong, the proud man's contumely,          The pangs of dispriz'd love, the law's delay,          The insolence of office, and the spurns          That patient merit of th'unworthy takes,          When he himself might his quietus make          With a bare bodkin? Who would fardels bear,          To grunt and sweat under a weary life,          But that the dread of something after death,          The undiscover'd country, from whose bourn          No traveller returns, puzzles the will,          And makes us rather bear those ills we have.          Than fly to others that we know not of?          Thus conscience doth make cowards of us all,          And thus the native hue of resolution          Is sicklied o'er with the pale cast of thought,          And enterprises of great pith and moment          With this regard their currents turn awry          And lose the name of action.</p> <p><b>WS</b></p>	<p>Then all the disrespect ones be out.          So, all of the items be like treasures.          There will be one act from you, loving.          Not specified, loving all, even the Satan.          That is not objective, not have any effect to us.          Just indicate the harm and cruel, so we can be away.          So, loving is an opportunity for making values.          Dreams for project at tomorrow, from past, yesterday.          All the puzzles for us, to inform and finding a way.          A road of love at humanity.          Consciousness is being at sure on love.          By ethical principles, as asking what is the truth?          Also in responding as what is the righteous to do.          Whether upside down, a balloon will not sink.          The waves is mixing the ideas to find the way.          The way of love. Finding the name of action, not for loosing.          If you want to know who you are.          If you indicated as ti be.          Looked at your heart, by mind.          Thus if you cannot find yourself there.          Thus you are not there.          So, indicating as not to be.</p> <p><b>MAA</b></p>

## Being, to be, freedom/liberty is connected with responsibility<sup>3</sup>.

Freedom, civil liberty, leads to accountability, individual obligation, duty means responsibilities, there are two-sided function.

So, below some decision on responsibility concept:

**Each person be a herald of evangel, given good news, and warning, information given duty, as a function of a community member.** Responsibility not to be blacked the life, be ready for happiness and joyful.

*The hope of a physician being good manner, effort about this.*

Being means at good manner, effort for them.

**Past is the history, future for later, so, we are the charge of ours, individual responsibility is obvious.** You cannot accused even your father and mother, how about you?.

*Consultation only gives ideas; the responsible physician is who care and serve the patient.*

Being means, if you are free, you must take your responsibility.

**For universal joke speaking, the responsibility be minimal, thus, if you intended and mind and heart unification indications be at great one, so, if you do not want to take the charge shut your mouth close.** Even some talking's be considered as criminal, so be care about it.

*In medicine, no joke will be permitted.*

Being, also indicates not at unhuman acts and jokes.

**The obvious act be an indication is as marriage oath, is for family establishing obligation.**

Be given an oath, tied yourself, your life, so be cautious and use your mind, and heart.

*Each medical applications has some grounding and reasoning according to medical science.*

Being, be as positive evident-based truth.

**Gossip and carrying the words, between person to another one, indicates taken no responsibility and not at a good habit.** Be aware not to talk from one person from back, how about when another person perform same to you?

*A physician must indicate, say the truth, explained deeply if not understands.*

Being is at proper condition, not making gossip, if perform, they will erase you.

**An individual only responsible themselves.** Opposite action performing, escaping person, thus not any trust given.

*Physician is responsible at medical consideration, nurse at care and serve, pharmacy at drug.*

Only be at the trust, means taken the concern as being.

**The fine, penalty about the intention to do, careless and fault, at crime, has different.** Being any kind of crime making requires the aiming point at the court.

*Complication is not any criminal act, so not any fine given.*

Being means be at love and humanity.

**When makeup, even not yourself, thus using it, if the person does not like it, only the person who made, and carry it to common be taken the obligation of this embarrassed.**

Greasepaint, makeup cannot be an ethical principle not believed for any excuse.

*If any makeup done in medicine, the physician be dismissed.*

Being on truth, not at makeup.

**Serve and care for the person who are in requirement.** As a Human being, each person is responsible to another one.

*Medical science, physician be responsible at health situation.*

Being for care and serve at any reason.

**If you have no idea, be not concern on it.** Know to say as I do not, thus, not I can tell.

*Consultation is required if you have less knowledge.*

Being, on what you know, study on.

**Each person has autonomous responsibility to be on humanity.** Being at individual Civil Liberties and Rights is obligatory required.

*A physician is responsible at a patient health, not at common, only information given.*

Being only at humanity at medical practice, science be the truth.

**Criminal acts only be taken their responsibility so, penalty, fine to them, as individual.**

Crime is objective and at evident-based, so not any argument on it, and who did it.

*Only the physician who cares the patient can take the responsibility at medicine.*

Being is meaning taken the responsibility of the crime, also.

**If information given, and enlightened, the responsibility of given consent is to the patient.**

Be taken information about the patient and the disease, in every manner is the right of a case.

*By taken consent, except Right to Life, be the passing of the responsibility to the patient.*

Being, by information, the consent as to the people.

**Outline:** If you are present, being has some accountability, freedom is not free for everything, freedom is taken yourself responsibility being a human is meaning at humanity.

## Discussion

To be, meaning as has the Rights, not to have no nobody concept, as not indicating as anyone, or stricter, upon the administration.

Some comments about this fact is indicated below:

**People thus, believe objective, but love is an abstract, be as main focus of the believing, sign of being.** Being in love means be sharing this to person and community.

*Being a physician is on the love concept at humanity, if at this perspective, health is such not only an individual right, be shared with the common, at every aspects.*

Believing as love and respect, and be on them, the nourishment be about this ideas, must be shared to the upcoming and be for value creation. Being in love is being, to be.

**Many people being notify the reality and truth, thus not be accepted and counter concepts ve in their mind and decisions, so, the rights be not performed and be a cruel.** If you give an information, thus the person performed any harm, let be a criminal act, and required punishment by law.

*Informed consent is essential for direct Medical applications, except the Right to Life conditions.*

Although you indicate the car on your way, if ed to go, crash is inevitable, so, not important who has the fault, you are also injured. The reality is you have a personality, being.

**Physician insisted to give the information for taken consent, not make any pressure of any persuasion also.** At health, the information be for treatment and medical care, such as hope and be warning to be happy, thus, not be taken the future responsibility, thus cannot be given warranties.

*Tyranny is forbidden, there cannot be done for their goodness and righteous by oppression, in medicine also.*

Information given is not meaning to worse and bad, damaging one, be an expectation of hope, and at goodness, or warn to the damage, harm, so, responsibility can be noted if not given the notice. A person is not object of a body, they are a Human being, so act on Humanity.

**Rights are not abstract, at real, like all the individuals have, contour actions and opposition at such ideas, as some are more rights, be escaping form humanity.** Law indicates the rights and crimes, so, .being arrange your way to right or wrong.

*In medicine the application depends on the patient evident, if away or spearing from the case, the procedures cannot be on at medical science.*

Case is the reality; thus the literature and books indications are not as same as exact of the case obvious verdict. Each person has a right of being.

**When you finished your work, become ending, thus for continuing one, you must left the function to a capable one.** Each action must be as an heir to the community, for considering as example, be proud of family, and of humanity as positive lesson.

*Each case be an example of medical science, so as a case report be an educational point be confronted as a responsibility of science.*

If you want to be remembered, be at humanity act and heir will be a good instance for future. The only heir that we gave to the new generation is love, only love.

**Homo sapiens, sapiens in genetic RNA fact from some ovum, so formed brotherhood relation, thus later on diverted and separated by harm and cruel acts, thus still at ethical principles and at benefit, positive side.** Individual benefit being want to be own for all, so jealousy for liar and oppression to get it, other side fighting for the reality on equality.

*In medical science each person is a member of same genus, Homo sapiens, sapiens, so, be considering equality, upon their diseases, as each case has a specific perspective.*

Each community being on equal rights as an individual, thus, the brotherhood, be not in consideration as, to be on top, administrative state. All people are from same mother, so consider it.

**The unification for marriage and divorcing be upon personal demands, thus, being on humanity with individual rights is obligatory.** Law concept on legitimate the act, thus the consent from individual, be free in action, behaviour.

*A physician only being active when the condition is happened on case, directly not at hypothetically, at real evident. .*

Being is on truth with reality finding, decisions being on evident. Presence, being is at reality, not at fantasies.

**Manager must be on individual rights, if not, so leading to cruel action, for controlling the people.** Being means be respect to the common, pressure may be seemed easy to control, thus not at reality.

*Physicians if want to control the disease, be in coordination to the case, patient functions.*

Being only by consideration of the body function at health, not bey demand or ordering.

**Science is the creational law, be on nature, if not be so much disappointed.** Education meaning being on reality, as in Medicine Science, concerning on the case realities.

*All the happenings are the reality on creation, thus, being in science, such the individual acts be fit about them, as a physician medical treatment is also in that concept.*

If you are being on case evident, you are always on medical science.

**Wherever, at whatever you are looking for, they are considering the natural law, from other point of view, such, indicating the fact.** Being on humanity, not making any difference or differentiation of them, such all are unique and special, thus being a member in a sea, called science.

*All the indications at Medical Science, the case, the people as a member of the community, for their being healthy.*

Being a human, means being on humanity, by special, unique, and sole person.

**If you are noticed the reality, you must give it, indicate the truth as information, thus, they must be deny and be against of it, so, in discussion, want to be on science grounding and reasoning at ethical principles.** Being on opposite, that can ve acceptable, until it is against the science, the reality.

*A physician can be in considering at several perspective, thus the patient evident be verdict to a special condition, so aiming to them will be obvious one.*

Each medical application be an invention, an innovation, if being at presence at specific reality.

**The sign and warning as one-way road, thus you entered, and traffic be in jam, you are in anger to the other, righteous one, why?.** After given the information and indicating the wrong way, thus if you still entering, this is a criminal act, so you must pay the fee, fine.

*A physician must be in consideration of the medicine as prospectus.*

Being not on the rules, thus not be at the wrong and dangerous way.

**Natural roles are not under our control, we must consider them.** Gravity is such a condition, including everything, so be care when walking.

*Each drug is a poison, so, medicine makes it as benefit at the diseases.*

Only be at being, at the natural law, not at opposite course.

**Some factors can be recordable after ending, like get the crop, after the cultivation.** In an exam, completing the answering paper, for passing.

*Physician must be under supervision of a patient, after the healing is encountered.*

Being is a result of born and living.

**The discrimination of gender, race and social status is forbidden; thus, Human being is genetically from same mother, relation s brotherhood.** In human acts cannot be for getting together, be away and escaping reasoning.

*Medicine is an agreement from patient to physician for being healthy reasoning. .*  
Diversity, can be crossed to be together, being.

**The person with ethical concept, at humanity be at a respectable position at the common.** Being as a friend is meaning of on ethical concept.

*Physician advice be on medical health, benefit for case, people..*  
Togetherness, being together is by love.

**If you are a human, not be under controlling with other person, not be with cruel and harm performing one, the ethical concepts are international, so, follow them.** Education and information taken, is a kind of knowing so, aware of danger, for escaping and for taken preclusions.

*Each case is a teacher and confirms the reality by evidence, so, lightening, enlighten is by evaluation the results.*

There is not any hesitation, and any doubt on science, thus the application be upon the case. Being can only with the reality on scientific reasoning.

**Only human can considering the Universe, and making decision, by capacity of learning and using of mind, so, this is the basic factor to be a manager of the World.** Being on truth, must be on ethical consideration, not considering about personal demands if out of science, if being on epic and fantasies.

*Physicians must be on medical science, if not, be dismissed form medical team member.*  
If you are on epic aspects and illusions, your presence is like dream.

**Education is also knowing the border of the rights, not be over and be aggressive for other person rights.** Aggravation by exaggeration, being over your rights, more than you gained, so, such more and more so, be missed the truth.

*Medical ethical considerations, primum non nocere, and treat not the disease the patient is the functional reality to be on.*  
Being, to know your position where you stand up.

**Like gravity, those are the Creational laws, no one can escapes of such items.** There is not any gap at the Natural laws, thus some in believe it can be, but only at epic histories not at reality.

*All physician exactly noticed, the differences not from medical science, from individual variations.*

Being is at each person has specific distinction.

**Even magicians being on science, the illusion is grounding on science.** If you can see a different perspective, as gravity same, the feather and ball falls differently, this is a detailed, the specify of the material.

*There is not any over manager than the creation, so, if you are at fairy tales, sure on wrong way.*

Being on fairy tales, like being at dreams, everything be a fantasy, not be real one.

**Forbidden be by law, crime indicated at legitimate, not at regulations or other indications, traditions, not on some person perspective.** Crime is known subjects, by solute fact, thus, information for the regulations, after can be forbidden, so, personal demands are not as crime.

*Not be over someone as health aspect, physician can confirm the limit.*  
Being on someone right, means balancing the reality.

**Each person decision be diverse, as a humanity consideration, special one, if be on harm, be at warning state, if at ethical principles, that will be leading to positive features.** If a person in love, leading to righteous concepts.

*Physician be at positive and be at humanity love, so medical application be in benefit.*

Being by love is the only way to be.

**The solution must be grounded on science, and reasoning at humanity.** If not at medical science, not to be at the same frequency for understanding.

*After the medicine has advers effect, it must not be given to the patient.*

Being is forbidden from harm caused ones.

**Rights of an individual must be at top, justice not as common sense, focused on individual consent.** Except Right to Life, each medical application requires consent, whether family or themselves.

*Information is not given the knowledge about the disease, just the connection of disease to a patient.*

Being can only be performed by consent, except Right to Life.

**Some people as a community, only one color, one type of society, so, discharge and make them immigrants or killing them.** Genocide is at some community only solution for being pure, thus is the worse among all the crimes, so International and at every National Constitutions it is illegal.

*Physician concerns the patient and the disease, as humanity in love, thus, some discriminations are forbidden to be, as genetic RNA, Homo sapiens, sapiens are one genus and being at brotherhood, whatever the difference is.*

Being as a human, not any discriminations ad gender, race, social status or so on.

**Information is essential to be understand and be choice your own way.** Behaviors are individual acts, if not causing harm and not cruel, as individual habit, so not be in consideration.

*Physicians are quite sure that, the disease be same, thus the appearance and outcome is differs, for each person.*

Being, first be encountered yourself, as unique and independent.
